Introduction

I am a web and software developer with strong skills in Java, .NET technologies, and database management. I have participated in multiple real-world projects and have experience in maintaining both hardware and software systems. With a passion for learning and a sense of responsibility, I am eager to contribute to the company's development projects while continuously improving my professional skills.

Skills

Front-End: HTML, CSS, JavaScript, Bootstrap

Back-End: Java, Spring Framework, ASP.NET Core, MySQL

Systems: Software and hardware maintenance, local network support

Other: Git, GitHub, UX/UI, teamwork, hardware troubleshooting

Projects

WEBSITE GAME 09/2024 - Present

Technologies Used:

- **Frontend**: ReactJS, Bootstrap, Axios, React Router
- **Backend**: Node.js, Express, MySQL, Sequelize, JWT, bcrypt, CORS

Project Descriptions:

- **User Authentication**: Registration, login, and user authentication system using password hashing (bcrypt) and JWT for securing API endpoints.
- **Account Management**: A user account management page where users can view and update their personal details.
- **Responsive Design**: Responsive design using Bootstrap to ensure a seamless experience across all devices.
- **API Integration**: Connects frontend and backend via secure API, handling user data and transactions effectively.
- **Payment Integration**: Planned integration with payment gateways (Momo, ZaloPay, Visa) to handle in-game purchases.
- **Database Management**: Manages user data and game-related
